

GYNOFIT moisturizing vaginal gel

Gynofit was developed in cooperation with gynecologists for the symptomatic relief of vaginal dryness and the associated symptoms.

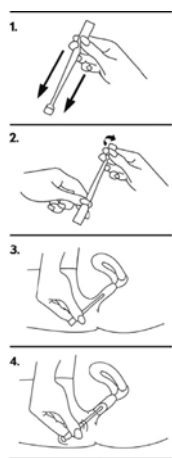

What is Gynofit moisturizing vaginal gel?

Gynofit moisturizing vaginal gel is an aqueous vaginal gel that forms a thin film of moisture on the vaginal wall and moisturizes the mucous membrane.

How do you use Gynofit moisturizing vaginal gel?

It is best to insert Gynofit moisturizing vaginal gel into the vagina in the morning. Each tube corresponds to a single application quantity. The gel is inserted directly into the vagina with a specially shaped, sealed applicator.

Remove applicator from the sealed wrapper. Then

1. Shake the tube contents against the tip of the tube.
2. Break off the tip of the tube by twisting.
3. Insert the applicator into the vagina.
4. Squeeze the entire contents into the vagina.

Gynofit moisturizing vaginal gel can be used daily as needed.

The use of a panty liner is recommended during treatment.

Gynofit can not be used for contraception and contains no spermicidal ingredients.

If your symptoms are not alleviated even when used according to the instructions, then contact your physician or pharmacist.

You should not use Gynofit moisturizing vaginal gel if you are allergic to any of the ingredients.

Composition (according to INCI): aqua, glycerin, propylene glycol, hydroxyethyl cellulose, citric acid, p-anisic acid, levulinic acid, sodium hydroxide.

Gynofit moisturizing vaginal gel contains no preservatives. Fragrance free.

Store out of the reach of children and at temperature (15-25°C).

If you suffer from an ill-smelling discharge, burning or itching, then we recommend that you use **Gynofit moisturizing vaginal gel with lactic acid**, available in 6 single doses.

Gynofit moisturizing vaginal gel with lactic acid and Gynofit moisturizing vaginal gel are medicinal products.

Available over the counter in pharmacies in 6 or 12 single-dose packets.
